# CS352: Sprint 1 – Team Name, Proj Name

# Daily scrum meeting template

## Contents

## Done requirements:

**Hammam :**

**Gobran :sequence diagram , create the web service and add fuction**

**Taqi : creating git hub repository ,create trello page , create SDS document ,add list all sequence diagram.**

**Auhentication and authorization on memory users .**

## What will be done today

**17/4/2020**

**create first class diagram**

**Hammam : creating trello page ,create first class diagram**

**Gobran : creating git hub repository**

**Taqi :explain backlog requerment**

**18/4/2020**

**Gobran:install Spring boot and initialization first program**

**Hammam: adding controller layer**

**Taqi:adding repository layer**

**18/4/2020**

**Hammam : add connection data base**

**Goban:add function**

# CS352: Sprint 1 – Team Name, Proj Name

# Daily scrum meeting template

18/4/2020

Hammam :update functions to deal with data base and update on SDS doc and  change on user class

Gobran : update on sequence diagram

Taqi:final check  all sprint

## Current obstacles

### Example:

# All members have same problem that they have different tools.

Gobran: I have problems to uninstall JDK1.8 and install JDK1.7

Gobran: Many errors in web services project (In eclipse)

That is why I used the intellij program

Another reason is the fact that the leader who started the work with this ide

Hammam : I have problem to install Mysql so currently I use Mongo Db may we change next sprint

Hammam: I have problem with data base connection

Hammam :I have problem with local host port there the error is dublicate on port

Taqi:bad connection and reach data base "has diffrant OS"

# Daily scrum meeting template

**8/april :**

**Hammam & Gobran think about security concepts**

**Taqi : suppose intial class diagram**

**Taqi :suppose initial sequence**

**10 April :**

**Gobran start learn Docker ,**

**12 april**

**Gobran did image docker but he had many problem**

**13  april**

**Hammam start build web security class**

**15 april**

**Taqi & gobran configure the restriction**

**15 april**

**Hammam and gobran add list all user authentication**

**17 april :**

**We could not know how , detecting on type user for restriction**

**Gobran done sequences**

**Hammam and taqi done class diagram**

**18 april**

*We decided to do authentication and authorization on memory users not data base .*
